Git, SVN, Jira	– 10 years

ENGINEERING

Platform Engineering	– 10 years
Integration Engineering	– 08 years
SOLID	– 03 years

👋 Hey there! I'm Atul Prakash, a seasoned Mobile Developer with a knack for developing applications across Apple's eco-system. With 10+ years of hands-on experience in iOS, watchOS, & macOS development, combined with mastery in Swift, SwiftUI, & React Native, & even dipping my toes into the world of Android.

Education

- Bachelor of Engineering – University of Bhopal

🔧 Technical Expertise

- Proficient in Swift, Objective-C, SwiftUI, & React Native with a deep understanding of iOS, watchOS, & macOS frameworks, and integrating APIs & SDKs
- Skilled in MVC, Singleton, Delegation, Category, Archiving & Observer Pattern
- Worked on Azure Services such as Azure Functions, Azure Scheduler, Azure Database, and others
- Good knowledge of ARC and MRC memory management. Experienced with Memory debugger and memory leaks
- Experience with all phases of the Software Development Life Cycle (SDLC) including requirement Analysis, WBS, HLD, LLD, TDD, BDD, SVN, Version Control, and production support
- Skilled with iTunes Connect to upload build for Test Flight and Publish on App Store
- Experienced in **XCTest** Framework to write test scripts for the Application

💡 What Sets Me Apart

- As Mobile Developer – I have worked in diverse field with different customers and suggested the best to be fitted as per their need – Retail, Consumer, Games, FMCG, Travel & Transport – I have delivered a quality of products, which is easy to use and navigate.
- As a Team Player and Individual contributor, I have always looked to find solutions for all the difficulties. Gather requirements and make them live accordingly. It's not only to perform own job, also drive the team and help everyone towards the utmost goal
- As Digital Experience (DX) practitioner, I often look for what new can be bring out on the customer table to serve, engage, solve issues and ready with the solution before problem will knock on the door
- As an innovator, I always try to enhance and sharpen skills and knowledge, grab new technologies, define the things in most presentable way and deliver best out of best

Industry

- Retail
- Consumer
- Travel & Transport
- Games
- FMCG
- Social
- Utilities

🚀 Let's Connect!

I'm passionate about leveraging technology to create meaningful experiences that enhance people's lives. Whether you're looking to collaborate on exciting projects, share insights, or geek out about iOS, watchOS, & macOS development with Swift, SwiftUI, & React Native or you want to share stuff about React Native / Android / Hybrid mobile app development, I'd love to connect!
